Total (weeks)	1.89333333333333
Rate (per hour)	30
plus VAT	36
Cost	**2556**

Assumptions
1. Database design is fit for purpose as it stands
2. Integration between app component and server component is not being tested from the app itself
3. No simulation of the whole interaction process of a 'game' is included. This would require the writing of a client simulator
